Save \$ With The New Pharmacy Plan

Wise Choice Rx

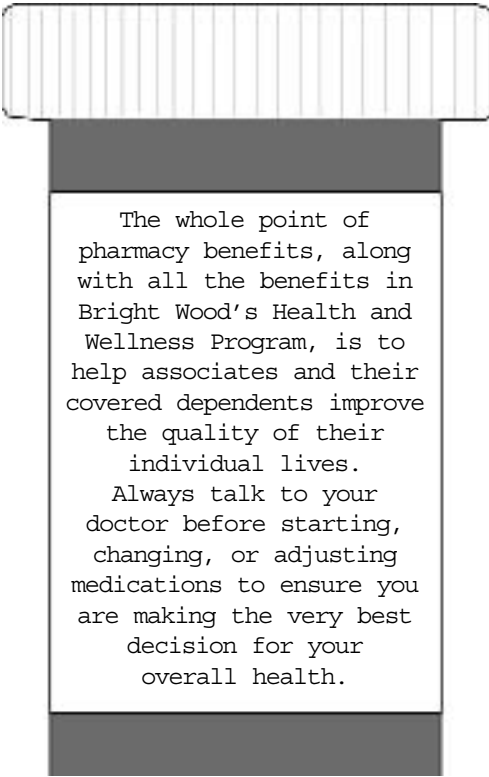

A free consultation service where an Innoviant representative reviews your medications to find ways to save you money using the plan's built-in options. Schedule an appointment by calling 877-809-6996 toll free between 5 a.m. and 4 p.m. Translation services available.

Rx OTC Program

Stomach acid and allergy sufferers can save money by switching to over-the-counter (OTC) drugs to treat their symptoms. Alavert and loratadine are two covered allergy options while Prilosec OTC can be a safe and effective alternative to expensive prescription drugs for acid relief. You will need a written prescription from your doctor to participate in the program.

Zero Co-Payment with Generics Rx

Generics are copies of brand name medications that have been fully tested and approved by the Food and Drug Administration (FDA). You have no co-pay when you fill a prescription of the following generic statins for treating cholesterol: lovastatin (generic of Mevacor),

The whole point of pharmacy benefits, along with all the benefits in Bright Wood's Health and Wellness Program, is to help associates and their covered dependents improve the quality of their individual lives. Always talk to your doctor before starting, changing, or adjusting medications to ensure you are making the very best decision for your overall health.

pravastatin (generic of Pravachol), and simvastatin (generic of Zocor).

Half Tab Rx – Tablet Splitting

In some instances, you can safely reduce your monthly prescription costs by consuming half a tablet rather than taking a full one in a lower, but equal, dosage. A 30-day supply of some medications, for example, cost the same in 20mg and

40mg dosages. Buying 40mg tablets and cutting them in half saves you 50 percent in annual co-payments for this prescription. You will need a new prescription from your doctor with the new dosage to participate. Call Innoviant toll free at 877-559-2955 to request a free tablet splitter (or you can purchase one at your pharmacy).

The following medications are safe to split and covered by the Half Tab Rx program:

Ambien
Atacand
Avapro
Cozaar
Crestor
Diovan
Lexapro
Lipitor
Toprol XL

benazepril (generic for Lotensin)
citalopram (generic for Celexa)
doxazosin (generic for Cardura)
fosinopril (generic for Monopril)
lisinopril (generic for Prinivil, Zestril)
paroxetine (generic for Paxil)
pravastatin (generic for Pravachol)
quinapril (generic for Accupril)
sertraline (generic for Zoloft)
simvastatin (generic for Zocor)
